1 Instructions

Step 1: Ensure that the device is powered on by activating the switch on the side of the device. This should be reflected by a green light on the top of the device.
Step 2: Open the application and hit allow on the prompted accessibility.
Step 3: You will be prompted with a welcome page; click the homepage button.
Step 4: The homepage has two buttons keyword selection and pairing; click the pairing button.
Step 5: The pairing page will automatically find the nearby device and text will show that it has found a device.
Step 6: Click the connect button found on the bottom of the page and wait.
Step 7: The application will say "Connecting.." and the device will have a blue light come on.
Step 8: The application says that the device is connected.
Step 9: Hit the back button in the top left corner of the screen; this will take you back to the home page.
Step 10: Click on the keyword selection button on the bottom of the screen.
Step 11: The keyword selection screen should pop up and you will see a list of available keywords and a drop down for confidence levels.
Step 12: choose the desired keywords that you want to be classified by clicking on the switch. The switch will turn green when the keyword is activated.
Step 13: By clicking the drop down in the top of the screen you can choose a value for the confidence level that you would prefer.
Step 14: You can now use the device as intended and it will react to the chosen keywords.
Step 15: You can now click the back button on the top left of the screen to return to the home page.
Step 16: By returning to the pairing page you will see an activated button that says "Disconnect" you may click this when you are done using the device.
